- Vision test
- Hearing test
- ECG
- Blood pressure and vitals
- ABPI Ankle Brachial Pressure Index
- BMI and body fat analysis
- Spirometry – Lung function
- Cardiovascular risk score QRISK3
- Cardiovascular Apolipoprotein specialised risk ratios
- Metabolic syndrome screening assessment
- Liver fibrosis risk assessment Fib 4 score
- Mental wellbeing assessment PHQ9 GAD7
- Perimenopause screening assessment
- Breast cancer risk assessment

Radiology Option A

- MRI Brain
- CT Calcium Score
- Chest- Xray
- DEXA Bone Density Scan
- Mammogram or US Breast
- US Thyroid
- US Abdomen
- US Abdominal Aortic Aneurysm
- US Pelvis

Laboratory

- Anemia and Vitamin/Mineral screening – CBC Ferritin Iron Folate Homocysteine Vit D Vit B12 Calcium Magnesium Zinc Copper
- Chronic Disease Screening – Lipid panel Liver panel Renal panel + EGFR BUN Thyroid panel TSH T4 T3 Thyroid antibodies anti-TPO anti-TG Diabetes panel HBA1c FS Fasting insulin + insulin resistance HOMA index AM Cortisol
- Uric acid
- Calprotectin
- Specialised Cardiac Markers – Apolipoprotein A1 Apolipoprotein B HS-CRP Homocysteine Lipoprotein A
- Cancer screening – Liver AFP Bowel CEA & Fit Test Pancreas CA19.9 Breast CA15.3 Ovarian CA125 Germ cell Tumors including BHCG Cervical Pap smear HPV high and low risk genotyping
- Women's hormone profile – Total and Free Testosterone Estradiol Progesterone LH FSH SHBG Prolactin DHEAS
- Inflammatory Markers – CRP (Acute) ESR (Chronic) HS-CRP (Linked to CVD) IL-6 TNF-Alpha
- Urine Analysis

Radiology Option B

- MRI Full body Head Chest Spine Abdomen Pelvis
- CT Calcium Score
- DEXA Bone Density Scan
- Mammogram or US Breast
- US Thyroid

Final report, follow up appointment, and aftercare

- Consultation with a Family Medicine Consultant with a specialist interest in Preventive Medicine
- In clinic aftercare appointment with full report breakdown, risk assessment, health education and management plan
- Co-ordination for onward referrals, additional tests, and aftercare with a dedicated wellness manager

AED 17000

Depending on the results of this health check, your physician may recommend additional tests to investigate specific concerns further. These might include advanced imaging, blood tests, or cardiovascular assessments. By catching issues early and following up with targeted tests, you can ensure optimal health and longevity.
